### Epic 7 a03.

With reflecting / totem spam, you do not need cleaning, but shields and spreading are necessary for Sheer-shah and my ten-tail fox. Neco is annoying in blocking, but reflecting deep maw is the easiest way to win this. Third, his letters are a huge level 9 Reborn 1, two levels higher than what you have faced before. This is right, but instead of just blocking it with totems like crazy, here you have to feed the blankets. In other circumstances - when adversaries are all non-chaos - the low terror can fill the same role. They are not so good, but they can buy some turns). Ignoring it and concentrating on the Warlord enemy is also an option. You can rely on a freezing / silence / transformation combo (Eostre is great here as a lot of men). Dudi The Innocent (Meeting 4-9), Brudi Bite (Meeting 4-21) has high-attack letters or a way to increase your attack. Cleanse is useful to keep the attack steal (loan trix recommended as it can clean). Blair + Charon, Soul Catcher (double attack runas) / disagree with cards like scrap, the king of garbage or Yorik. Hoodoo Vanhaakauri Cernun, ArcDruid Mi Ten-tailed fox deals damage to enemy cards when played. Villanielle (Meeting 2-9) Even though the convenience is weak, the focus must be killing your herois. As the last ones, reflect it is excellent, but this time you will need some shells in your totems or my ten-tail fox will kill them quickly. Cleanse is also highly recommended. Zazy Long-Language (Meeting 9-18) Obviously, não attacking it or you will have heavy poison damage. Tara Goldilocks (Meeting 3-8) This meeting introduces several new letters. If you log in to the wrong department, use the Epic button and click Á ç à € ± ± Change peak. When the blankets are above 132 He will kill his warlord lord in 2 laps, then put 1-2 totems through the blankets and is done. He he Well with Shadow Shaa-Moela for some attack fans, but especially you will want him to bend in shields along with Charon, Soul Catcher. Or a huge Yshtm'ala to boost the meaning of your opponents that you can not romerate? Saint Celestine (Meeting 1-11) Low-level hergs means you can drill easily. Enemy deck is quite weak totem. App is again very good. Shaa can replace one of those, if necessary, but I liked the freezing / reburver / silence / transform combo more than the stalling skills of Shaa. Same kind of boss, but now 80%. Coba is new and he will heal his Warlord Lord, but the key to fighting the Coba is to throw his body-to-body body in the second row (without poison and therefore do not heal) or to use cards with immunity. Patrick The Famous (Meeting 9-29) There are 2 major questions here, the 200 venom is the obvious. Scrap, the King of Garbage is extremely dangerous and will put the harvest in you. Diplus (23) (Meeting 3-23) This is the first encounter to pack legendary cards and he is bringing 2 of a once time, [[and diploma [and Mr. Devil. Field Hospital (Meeting 2-17) A defensive enemy deck with many healing, use Trxy Kill or high-attack cards to drill. In addition, it is only piercing using the usual men, this is relatively easy if you did it as far. Because if they are there, they can not put any unit, right? Control deck is decent here, but again Yorik makes it difficult for any strategy. Sector 8: Sea Heart Melis Snake Hiss (Meeting 8-1) We are starting the sector with a genetic poisonous chief. Control of HRBER S or Reflect are the way to go, along with the convenience + Damage based on skill. The biggest issue is groot, quiet guardian. She has also fly, makes her difficult to beat. You then put a grumpy ghost at the point. In the upper line. YSH is great overall due to your body-to-body cells, gathering rapidly with golens that do not do anything if there is no Sector 3: Fan Valley © Rory Rory (Meeting 3-1) You will see 2 new enemy cards, but they are not dangerous. It is not very trustworthy, but if you are stuck, it is worth using one of them with double attack to try to kill the Lord of the war. Next option is the convenient control. Mis-day line, therefore, means A2, B2, C2 and D2. Turn 2. HP is fine, but later, you will not do much. Document in real time, or the closest possible. Dominus is also an option as well as scrap, the king of garbage. Still, reflecting is again the best option, preferably with shields. Another chief of flight, but with a weak deck. Reflecting is by far the easiest option mixed with the convenient control, but even so, it is difficult. If you are using ogre, try and triton silence and / or poisonous flakes with your skill. It can cause huge damage in line, but only when it dies. The call makes you eat this 500 damage, but if you are here, your war lord should be able to tank. Second option is to use tmala ysh across the horo-horo. Skill damage still works normally (even things like Tinker's damage to nature or reflecting puppets) and you can still silence or transform cards. Tinker's own is not threatening unless you are mainly using nature. Check out our other Abyss guides here. I hope this helps. Trickster Don Chong (meeting 5-9) in comparison with previous meetings, this is ridiculously easy. Void Juggler (you will unlock it early, high attack + granting an extra attack causes it to be very well early) rare frozen moor guard (freezing 2 no-nature is again very useful) Harvester Grim. Grevekeeper ( a cheap fountain of double attack) balance of balance (makes a whole line miss for 1 turn so excellent if ai decide to stack in 1 line) scarecrow (if you leveled, it is very good against the heads of Nomad (can buy one turn with your lack of skill) Hunress Demon (good anti-chaos) Place (set HP for 1 is good with pirate pirate or other skills such as Splash or Pierce) intelligent viper (good anti-order) Heavenly Maiden (Fly + Mental Shield makes her big against bosses to melee body) The aquatic spirit (freezing 2 again) Death of death (Fly + Reborn does Great against Cultists Cultists (if you level, Bush has some quite high HP spawn (freezing a damage from Lane + Warlord, which is not bad) Drow (high damages, but is random) Ding Viesel (Excellent way to take an unpleasant, especially when you have letters with Pierce) Ice Piece (Good Blocker / Staller) Dark Warrior (Good Status and a Mental Shield for the Lord of War, very good) Tensan tower (Good) excellent way to damage the enemy warlord) orc master (really good way to get some double attack if you have a high attack card) dark tree (can be unpleasant with chaos allies to surprise ai) empty stone (very good against the bosses convene m UITO) First aid (decent healer) Totem (some decent damage to every shift, mortal with Blai r) Warlord The first sectors can be clarified using virtually any skin of war, although the recommended skills will be listed when it comes to. It looks like a really unpleasant boss, but it's not so bad. Control of HCK is also good (as always), but random silence means that you need to have some luck to go through it. Reflect ignores invulnerability, as there is no physical damage. The biggest problem is feast with his 4x attack and possible mental shield. If you do not have cleaning, try to use Mr. Flap, D'ARC, Iron Maiden or Ysh'tmala, the old God to earn more HP than he can take off. The best option here is to use the legion deck (just, fury, legion) with ogre (silence) and some extra silence to land the pamphlets if oi try to use those to block their multi- Attackers. APPE is a star Put it in the A3, then it can attack first and reborn triggers. Save your sudden deaths as every time you do not use them grow grow As you go higher levels, the placement of your letters becomes quite vital and more. Some silence / transform it is not bad. CNTRL + F The guide for the word "Doctor" if you need help, but the key is only to ignore the document. Both together will grow quickly in attack power. It's easier to say than done - you at least have agony with high attack on the board. Lost Name (Meeting 5-15) This boss copies Snake's ability a little and in Sheer Shah with double attack coming from Disagreement makes it extremely deadly. Caution If it has more than 1 carton with block in the field while the spread will hurt if this happens. Bigger question with this strategy is tmala, so if you can handle it, then you will win. Core: Madame Agony, Essre the dawn glow, Frost, Snow Queen, Shadow Shaa-Moela so you tried everything and you simply are not strong enough. Lanariel (meeting 1-24) a lot of frogs, but now +2 attack per turn. Tips for customizing the Epic SmartTools use SmartTools to automate your documentation. Patient record smartlinks pull information in documentation; SmartText Á "e automatically a larger block of text after some characters are typed. Tortulus of silence or just ignore it using buildings. The best strategy is to use a mixture of convocation (ignores freezing runes and the totems, reflect (for Mizu / Cernun) and silence (Maeve first, but MyRdin / Mizu, if necessary). Silence / Matify it as fast as possible. When you are as soon as possible. When you are facing it, you will probably have limited options, but again, most of the peaks / legend Rivers that you will have as with the first 8. Cleaning is really good here, as it removes the skill in death. Then give Koschei a totem and this boss is dead in no time. Master of Ceremonies Lau (Meeting 9-37) of heavy silence on this as your body are very much in accordance with 3.7k HP, cure for 1500 and Vain. Once again, beware Yorik so wait until he has been played or or Your totems. He can damage the tank and throw it back to the enemy. Ogre Warlord The skin is a great help. Block + cure of first aid can be a difficult combo. In any case, you have a last shot of long durability. Cleanse is highly recommended to get rid of poison and freezing. The grid is made of 4 lines (A, B, C, D) and 3 columns or lines (1, 2, 3), which can be seen below: An example of battlefield field A1 A2 A3 B1 B2 B3 C2 C3 D1 D2 D3 For example, if D1 is recommended, it means lower left corner. All your cards below half HP die and some saneous attack steal. Dita The Traitor (Meeting 9-25) Note: I am currently stuck in this boss, so that the typical ones are now based on that heavy spent - à € œ
